PROFILE

Cross-functional professional spanning technical operations, process improvement, AI-enabled workflows and professional communication. Strong at understanding how work gets done, finding practical improvements and making technology understandable and usable for people.

Strengths: Digital enablement & AI | Process improvement | Change & adoption | Workflow design | Stakeholder engagement | Training | Technical communication

SELECTED IMPACT

- **Process improvement** - Developed a structured Clarify-based triage and follow-up approach for a technical support queue; resolution performance improved by approximately 50% within one week.
- **AI-enabled workflow** - Created Digestible Soda, an automated RSS-to-digest system that filters content, uses AI to generate summaries and engagement springboards, stores results and delivers scheduled content digests.
- **Content project ownership** - Created, wrote, hosted and produced the 10-episode podcast The New Christian, including most editing, artwork and publishing; at least 2,609 downloads recorded.

CURRENT EXPERIENCE

HOPE 103.2 - SYDNEY

SEP 2024 - PRESENT

Announcer / Content Creator

- **End-to-end delivery** - Research, write, produce and present a four-hour weekday Drive program, balancing daily deadlines, audience needs and live execution.
- **Campaign communication** - Turn fundraising playbooks into live audience-focused messaging and rapidly edit interview clips for reuse across dayparts.
- **Continuous improvement** - Use Workflowy, Microsoft 365, Copilot, ChatGPT and other AI tools to streamline research, planning and content production; latest audience research showed an upward trend for the program.

DIGESTIBLE SODA

2026 - PRESENT

Creator - AI-assisted content workflow

- **Workflow design** - Defined the end-to-end process, filters, outputs and scheduling for a reusable content discovery system aimed at radio, podcasts, YouTube and brand monitoring.
- **AI-assisted implementation** - Built and iterated the system primarily with Claude and OpenCode, using AI to accelerate coding while retaining ownership of requirements, testing, judgement and overall design.

TECHNOLOGY, PROCESS & CHANGE EXPERIENCE

FUJI XEROX AUSTRALIA

MAR 2010 - MAR 2017

XOS Remote Analyst

- **Technical implementation** - Installed and supported managed print software on customer servers, working with customer IT, Sales and internal technical teams.
- **Process mapping** - Created and maintained cross-functional workflows and swimlane diagrams covering ownership, hand-offs, escalation and resolution.
- **Requirements & documentation** - Created a version-managed technical pre-sales and implementation workbook to standardise discovery, requirements capture and deployment information.
- **Change support** - Acted as a team-level change agent on internal initiatives and produced technical/procedural documentation to support adoption and consistent delivery.

FUJI XEROX AUSTRALIA

APR 2005 - JAN 2007

Technical Support Specialist

- **Service improvement** - Managed support queues, wrote technical knowledge-base content and used Clarify data to monitor operational performance.
- **Triage redesign** - Introduced clearer ownership and structured follow-up so actionable cases progressed instead of cycling through a backup queue.

COMPUTER TROUBLESHOOTERS

JAN 2008 - MAR 2010

Senior Technician

- **Small-business solutions** - Provided repair, networking and web support while helping customers choose practical technology solutions for their business workflows.

COMMUNICATION, LEADERSHIP & EARLIER EXPERIENCE

Professional broadcasting roles across Hope 103.2, MAX 1073, 2TM / 92.9 and Port Stephens FM have built high-level presentation, writing, audience engagement and deadline-driven production skills. Earlier roles also include IT service desk work, a Qenos laboratory role where an Excel tool was created to reduce human error, and co-directing UNSW Med Revue with responsibility for a 50-person cast.

EDUCATION & TOOLS

Education: Advanced Diploma of IT (Systems Administration), TAFE NSW St George | ITIL v3 Foundation | Graduate Diploma of Radio Broadcasting, AFTRS | Bachelor of Science (Chemistry), UNSW

Tools: Microsoft 365 (Outlook, Teams, Word, Excel) | Copilot | ChatGPT | Claude | OpenCode | Workflowy | n8n | Linux | Git/GitHub | HTML/CSS | APIs
