## CORE STRENGTHS

- Digital enablement & AI
- Process improvement
- Change & adoption
- Workflow design
- Stakeholder engagement
- Training & facilitation
- Technical communication

## SELECTED TOOLS

Microsoft 365 & Copilot

ChatGPT / Claude / OpenCode

Workflowy / n8n

Linux / Git / GitHub

HTML / CSS / APIs

## COMMUNICATION EDGE

Professional broadcaster and content creator: live presentation, writing, audience communication and deadline-driven delivery.

## PROFILE

Cross-functional professional spanning technical operations, process improvement, AI-enabled workflows and communication. Turns messy work into clearer processes, practical tools and changes people can understand and use.

## SELECTED IMPACT

- **Process improvement** - Used Clarify data to help redesign technical-support triage and follow-up; resolution performance improved by approximately 50% within one week.
- **AI-enabled workflow** - Created Digestible Soda, an automated RSS-to-digest system that filters, summarises and schedules content.
- **Content ownership** - Created, wrote, hosted and produced the 10-episode The New Christian podcast; at least 2,609 downloads recorded.

## CURRENT EXPERIENCE

### HOPE 103.2 - SYDNEY

Announcer / Content Creator

- **End-to-end delivery** - Research, write, produce and present a four-hour weekday Drive program.
- **Campaign communication** - Turn fundraising playbooks into live audience messaging and rapid-reuse audio.
- **Continuous improvement** - Refine planning and research with Workflowy, Microsoft 365 and AI tools; recent audience research showed an upward trend.

### DIGESTIBLE SODA

Creator - AI-assisted content workflow

- **Workflow design** - Defined the process from RSS ingestion and filtering through AI summarisation, storage and scheduled delivery.
- **AI-assisted implementation** - Built and iterated with Claude and OpenCode while retaining requirements, testing and design ownership.

## EDUCATION

Advanced Diploma of IT  
(Systems Administration)  
TAFE NSW St George

ITIL v3 Foundation

Graduate Diploma of Radio Broadcasting  
AFTRS

Bachelor of Science (Chemistry)  
UNSW

## CAREER RANGE

- Enterprise technical operations
- Small-business IT
- Process documentation
- AI-assisted workflow building
- Professional broadcasting

## TECHNOLOGY, PROCESS & CHANGE

---

### FUJI XEROX AUSTRALIA

XOS Remote Analyst

- **Technical implementation** - Installed and supported managed-print software on customer servers, working with customer IT, Sales and internal technical teams.
- **Process mapping** - Created and maintained cross-functional workflows and swimlane diagrams covering ownership, hand-offs and escalation.
- **Requirements & documentation** - Adapted a technical pre-sales and implementation workbook to standardise discovery, requirements and deployment information.
- **Change support** - Produced procedures and documentation that supported adoption and more consistent delivery.

### FUJI XEROX AUSTRALIA

Technical Support Specialist

- **Service improvement** - Managed support queues, wrote knowledge-base content and used Clarify data to monitor performance.
- **Triage redesign** - Introduced clearer ownership and structured follow-up; resolution performance improved by approximately 50% within one week.

## COMPUTER TROUBLESHOOTERS

Senior Technician

- **Small-business solutions** - Provided repair, networking and web support while helping customers choose practical technology solutions for their workflows.

## COMMUNICATION & EARLIER EXPERIENCE

---

- **Professional communication** - Broadcast roles across Hope 103.2, MAX 1073, 2TM / 92.9 and Port Stephens FM developed high-level presentation, writing and audience communication skills.
- **Earlier improvement work** - Created service-desk documentation at Kelly Services and an Excel tool at Qenos to reduce human error.
- **Leadership** - Co-directed UNSW Med Revue, coordinating a 50-person cast across writing, rehearsals and production.
