PROFESSIONAL PROFILE

Cross-functional professional with experience spanning technical operations, process improvement, AI-enabled workflows, training and professional broadcasting. Combines practical technical fluency with strong presentation, writing and content skills. Experienced in improving workflows, documenting processes, implementing technology, training users and translating complex information into clear, usable outcomes.

Core capabilities: Digital enablement and AI | Process improvement | Change and adoption | Workflow design | Stakeholder engagement | Training and facilitation | Technical communication | Content development

Current tools: Microsoft 365 (Outlook, Teams, Word, Excel) | Copilot | ChatGPT | Claude | OpenCode | Workflowy | n8n | Linux | Git/GitHub | HTML/CSS | APIs

CURRENT EXPERIENCE

HOPE 103.2 - SYDNEY

SEP 2024 - PRESENT

Announcer / Content Creator

- Own the end-to-end daily content cycle for a four-hour weekday Drive program: research, writing, audio editing, production and live delivery under tight deadlines.
- Use audience feedback and research to refine content; the latest survey showed an upward trend for the program while most comparable shows were stable.
- Support major fundraising appeals by turning campaign playbooks into live, audience-focused messaging; record and rapidly edit interview clips for reuse across dayparts.
- Conceived, researched, wrote, hosted and produced the 10-episode podcast The New Christian; completed most episode editing in Reaper, created artwork in Canva and published episodes in Omny Studio. At least 2,609 downloads recorded.
- Continuously improve personal production workflows using Workflowy, Microsoft 365 and AI tools to reduce repetitive work and increase usable content output.

DIGESTIBLE SODA

2026 - PRESENT

Creator - AI-assisted content workflow

- Designed an automated workflow that polls grouped RSS feeds, filters unsuitable or low-value material, uses AI to generate summaries and audience-engagement springboards, stores processed content in a database and delivers scheduled daily digests.
- Built and iterated the project primarily with Claude and OpenCode, using AI-assisted development while defining requirements, testing outputs and shaping the end-to-end workflow.
- Designed the system to support multiple use cases including radio, podcasts, YouTube and brand/content monitoring, with optional weather and evergreen engagement prompts.

TECHNOLOGY, PROCESS AND CHANGE EXPERIENCE

FUJI XEROX AUSTRALIA

MAR 2010 - MAR 2017

XOS Remote Analyst

- Remotely installed and supported managed print software on customer servers, liaising with customer system administrators, internal Sales and technical teams to implement solutions.
- Created and maintained operational workflows and process documentation, including cross-functional swimlane diagrams, customer-engagement documentation and service/cancellation workflows.
- Adapted an internal customer-engagement model for the Remote Analyst team, creating a version-managed technical pre-sales and implementation workbook to standardise discovery, requirements capture and deployment information.
- Supported internal change initiatives as a team-level change agent, helping colleagues understand and adopt changes under the direction of senior change leads.
- Produced technical and procedural documentation to support consistent delivery and knowledge sharing.

FUJI XEROX AUSTRALIA

APR 2005 - JAN 2007

Technical Support Specialist

- Researched and resolved customer technical issues, managed support queues and wrote technical knowledge-base documentation.
- Used Clarify case-management data to monitor queue performance and helped implement a structured triage and follow-up approach that improved resolution performance by approximately 50% within one week.
- Focused the revised process on clearer case ownership, consistent follow-up and separating actionable work from cases awaiting customer contact.

COMPUTER TROUBLESHOOTERS

JAN 2008 - MAR 2010

Senior Technician

- Delivered computer repair, networking and small-business technology support, including web design.
- Worked with customers to identify practical IT solutions for their business needs and workflows.

COMMUNICATION AND LEADERSHIP EXPERIENCE

Professional broadcasting roles across MAX 1073, 2TM / 92.9, Port Stephens FM and AFTRS have included live presentation, copywriting, news, audio production, music direction, training and audience engagement. These roles strengthened facilitation, rapid communication, editorial judgement and the ability to explain ideas clearly to broad audiences.

SELECTED EARLIER EXPERIENCE

2004 - 2010

- Qenos - Laboratory Technician: created a small Excel tool designed to reduce human error during night shift.
- Kelly Services - IT Service Desk Analyst: user administration, issue resolution/escalation and role documentation to improve user-management procedures.
- UNSW Med Revue - Co-Director: led a 50-person cast and coordinated with producers, technical, vocal and choreography teams.

EDUCATION AND CREDENTIALS

Advanced Diploma of Information Technology (Systems Administration): TAFE NSW St George, 2010 - servers, virtual environments and project management

ITIL v3 Foundation: EXIN, 2011

Graduate Diploma of Radio Broadcasting: Australian Film Television and Radio School, 2017

Bachelor of Science (Chemistry): UNSW, 2003 - philosophy minor
